

#LeicsDivest

PETITION TO THE LEICESTERSHIRE LOCAL GOVERNMENT PENSIONS FUND COMMITTEE:

In light of the worsening impacts of climate change, and the energy and cost of living crises, we, the undersigned local people, Council Tax payers and pension scheme members call on you to:

1. Publicly commit now to ending all investment in fossil fuel companies by 2025.
2. Move the money currently invested in fossil fuel companies to local solutions to fuel poverty and the climate crisis such as renewable energy and energy efficient social housing.

The globally agreed plan to tackle climate change by drastically reducing carbon emissions is being undermined by the fossil fuel industry's development of further coal, oil and gas fields.

Fossil fuel businesses are becoming financially risky places to invest in. Maintaining a stake in fossil fuel companies will soon be contrary to the Pension Fund's 'fiduciary duty' to ensure reliable returns from the Fund's investments.
