

Outline of the Climate Coalition Leicester and Leicestershire.

If your group, organisation or community wants to join the Climate Coalition as a partner, we ask that you:

- 1/. Explicitly support Climate Action L+L's overall goals. This means we can say publicly that you support them.
- 2/. Have your name on Climate Action's website as members of the Coalition.
- 3/. Tell your membership that you are part of the Climate Coalition, what we are doing, and encourage them to get involved (this is not a requirement).

As coalition partners you don't have to support Climate Action's working group aims as these will change as the working groups develop.

Coalition partners can choose to what extent you get involved with Climate Action L+L's work. You can work with us on specific projects as a group, you can encourage members to get involved with Climate Action's working groups – or you can have nothing to do with them and simply endorse consultation responses occasionally.

As a coalition partner you agree that you will try to ensure what you do does not in any way undermine what other coalition partners are doing to tackle the Climate Crisis by checking before you act. If conflict arises you will work together to resolve it.

Sometimes Climate Action will organise activities or events which everyone in the Coalition is invited to join in with – such as action days, vigils, petition signing, and the chance to endorse consultation responses.

The Coalition's overall goals which Coalition partners need to support are:

- 1/. The City and County Councils to set annual, measurable carbon reduction goals for Leicester and Leicestershire to achieve net zero greenhouse emissions by 2030.
- 2/. The City and County Councils and Leicester & Leicestershire Economic Partnership to review their Local Plans, Strategic Growth Plan and all other future policy and plans in the light of their climate emergency declarations and national carbon reduction targets.
